

水質過濾袋 WATER FILTRATION BAG

N00600

N00610

N00620

特性:

本水質過濾袋可處理過濾一般有機雜質，防止海水中下雜魚蝦卵粒及幼生進入繁殖池，使蝦苗擁有舒適的生長環境。

材質: 由 100% 之聚脂稀纖維構造，再經矽化處理及靜電防止特殊處理。

使用方法:

在進水管上套上本水質過濾袋，加以綁緊，既可過濾水中雜質。使用本水質過濾袋應視水質狀況每過 80~100 噸水後換洗，可延長水質過濾袋使用壽命。

PS: 可依需要另外訂做

Effect:

The water filtration bag can handle and filter miscellaneous organic substances. Prevent trash fish and prawn eggs or larvae to enter into breeding pond. Let them grow in a comfortable environment.

Materials:

100% made of polyester fiber and processed from anti-static treatment using silicone ingredients.

Usage:

Attach the water filtration bag to a seawater aqueduct, all miscellaneous organic substances will be separated from the seawater. Clean the filtration bag after being used to filter water of 80~100 tons to lengthen the lifespan of the filtration bag.

PS: Please call for any other specification you want to require
