## SHRIMP MAX UP

Oxygen-Boosting Formula: SHRIMP MAX UP  
-Special Calcium Compound for Accelerated  
Shrimp Shell Formation

Choose SHRIMP MAX UP for a robust formula designed to enhance oxygen levels, promote healthy shell formation and address various shrimp-related challenges.

### Recommend Usage:

1. Before releasing shrimp: Use 1 bag to enhance molting and firmness.
2. Culture Period: Apply 2-3 kg per 1,600 square meters to promote overall growth.
3. For molting and soft-shelled shrimp: Use 3-5kg per 1,600 square meters to address specific issues.
4. For mature shrimp with white, opaque muscles: Use 5kg per 1,600 square meters.

### Composition:

- |                  |                |
|------------------|----------------|
| 1. Calcium       | 6. Bicarbonate |
| 2. Magnesium     | 7. Sodium      |
| 3. Potassium     | 8. Chloride    |
| 4. Oxygen Powder | 9. Sulfate     |
| 5. Phosphorus    |                |

### Benefits:

1. Accelerates the rapid development of shrimp shell.
2. Clear noticeable results.
3. Reduces issues such as soft-shelled, blue colored and thin-shelled shrimp.
4. Minimizes cannibalism among shrimp.
5. Hastens shrimp weight gain before harvesting.

### Intensive shell-building mineral complex:

1. Shell-forming lime to increase calcium in water.
2. Concentrated mineral head enhancer for accelerated shell development.
3. Softening remedy to reduce vulnerability and address issues like soft-shelled, white, opaque.
4. Solution to minimize shrimp molting problems and ensure strong shells.

### Package:

Net weight 10kg.
